

# Chesley Brown International....

## Our Vision, Mission & Philosophy

At Chesley Brown International, we live our vision, mission and philosophy on a daily basis. We accomplish this by sharing this with our employees on a continual basis as well as providing the necessary training and tools for our employees to be successful. Our vision, mission and philosophy are as follows:

### **Vision**

To be recognized as *the premiere* global security management company.

### **Mission**

To provide customer focused security management services.

### **Philosophy**

Each property we serve presents a unique set of security and safety challenges. It is our belief that security management is more than staffing a property with security personnel. Our approach centers on listening to our clients and applying our expertise to respond to their needs.

In order to fulfill our vision, mission and philosophy, we must have dedicated and well trained officers and leaders at Chesley Brown International. We realize they are the strength of our organization. Two of the ways we provide the necessary tools for our officers and leaders to be trained and prepared to provide premier global security management to our clients is through Chesley Brown University and our F.L.I.E.R.S. program

Chesley Brown University is not just a commitment to our employees, but is ultimately a commitment to our clients. Chesley Brown University grew out of our desire to ensure consistently high levels of performance throughout our clients' portfolios. To that end, we have developed a highly focused curriculum of course work designed to reinforce Chesley Brown policies and procedures, as well as our unique corporate culture.

Our corporate culture is anchored solidly in the belief that, while the future is unpredictable, a continual focus on education will provide us with the flexibility and creativity we need to make the most of opportunities and challenges the future presents.

Our F.L.I.E.R.S (Field Liaison Integration and Evaluation Response Specialists) are our specially trained officers who are responsible for remote specialized training and transition of new properties. They are also called in during emergency situations.

We realize in order to maintain our competitive edge and provide the level of security Chesley Brown International clients have come to expect, we must continually train and grow our most valuable asset...our employees.
